

PXT series

Robot for stacking cardboard boxes

Cartesian Robot Palletizer

PXL series

PXW series

Watch the video

On behalf of humans

Improve stacking work without hassle.

Stacking work issues

Not enough workers

Want to mechanize but don't have enough space

The factory ceiling is too low to install robots

Can't install a compressor

Don't have anyone skilled in machine operation

A palletizer can help you solve logistical challenges.

Reduce time spent on standby and waiting to load trucks

Improve systems for shipping and receiving

Improved situation with respect to shortage of staff in warehouse

Work style reform (working hours, wages)

Make stacking work more efficient

Greater efficiency and automation

Handle issues like these

- ✓ Workplaces with many women and elderly people
- ✓ Dusty, high-temperature, low-temperature, or high humidity environments
- ✓ Continuous work for long hours
- ✓ Stacking in specified quantities
- ✓ Trouble such as cargo collapse

Palletizers are making inroads in various industries

Effects of Adoption

In the case of Company S

- Work transferring goods to a six-wheel cart
- Introduced two PXW-1535

Personnel

Staff: 10 people → Staff: **1 person**

Nine staff members could be assigned to different tasks

Quantity processed

3,500 boxes/day → **7,200 boxes/day**

Improved productivity and work efficiency on the line

Labor costs

13.5 million yen/year → **3.24 million yen/year**

Significant reduction in labor costs

* Cases in Japan

Easy to deploy

Can be installed in spaces with low ceilings

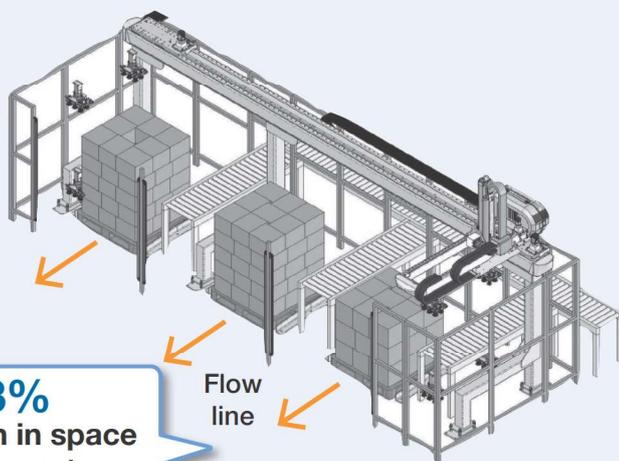

Can be installed in spaces where height is limited, such as a clean rooms

Example of palletizer installed in a space with low ceilings (electronics manufacturer)

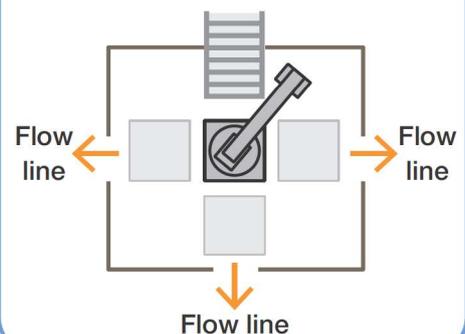

Flow line can be used effectively on plant floor

The flow line is in the same direction, allowing for efficient operation even when using multiple pallets.

63% reduction in space
(Compared to articulated robots)

When an articulated robot uses multiple pallets, the flow lines differ.

Easy to operate

Heavy labor

Space

Overall height

Inefficiency

Cost

Solve **5 issues** in stacking operations

Reallocate human labor from rote work, to work only humans can do

Freeing valuable personnel from heavy labor allows them to be assigned to work that only humans can do. This allows limited human resources to be used more effectively.

Easy operation by touch panel

Touch panel operation makes the palletizer easy to operate.

7-inch wide screen

Practical safety measures

We use our experience with unloaders to implement practical safety measures. We can also provide individualized safety measures by customer request.

The palletizer sits on casters, making it safer to move for things like changes to the layout of the plant floor. (Equipped as standard on the PXT Series)

Operation stops instantly if someone enters the work area. (Equipped as standard on the PXT Series)

Examples of adoption

PXT-1220: Food product company

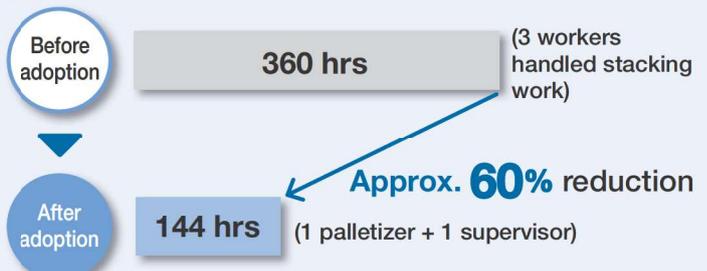

PXW-1550: Chemicals company

Make stacking work more efficient (reference)

The effects will be easy to see

The cited figures are for reference only. They may vary depending on conditions.

Robot Palletizer for low overall height

PXT series

PXT-1220A/PXT-1220+/
PXT-1235

PXT-1220+

An overall height of 2,000 mm or less ensures they effectively utilize the smallest amount of space.

(*The overall height of PXT-1235 is 2,214 mm.)

Handles A3 Size packages.

Watch the video

Load capacity and stacking height can be individually adjusted.

2,685 mm

2,025 mm

2,000 mm
(* Signal light not included.)

Can also be used together with pallets.

PXT-1220A

Even easier to use than before.

► Payload

Supports up to **20 kg** PXT-1220A/
PXT-1220+

(Including robot hand weight)

Supports up to **35 kg** PXT-1235

(Including robot hand weight)

► Processing capacity

8 boxes /min PXT-1220A/
PXT-1220+

10 boxes /min PXT-1235

*Based on our evaluation criteria

► Size

PXT-1220A

2,385 (L) × 2,025 (W) × 2,000 (H) mm

PXT-1220+

2,685 (L) × 2,025 (W) × 2,000 (H) mm

PXT-1235

2,488 (L) × 1,980 (W) × 2,214 (H) mm

(* Width and height does not include signal light.)

Supports Type T11 to T14 pallets

Flexibly handles stacking work.

T11 1,100 (L)
×
1,100 (W)

T14 1,100 (L)
×
1,400 (W)

Commonly used
pallet sizes

Food, pharmaceuticals	1,100 (L) × 1,100 (W) mm
Frozen food	1,200 (L) × 1,100 (W) mm
Beverages	1,100 (L) × 900 (W) mm
Cosmetics	1,220 (L) × 1,220 (W) mm

(PXT-1200+ equipped as standard)

Casters for easy movement

The palletizer can be moved around freely to accommodate changes in plant layout or operating conditions.

Watch the video

Handles A3 Size packages

Can handle packages up to 450 (L) × 310 (W) mm.

Option

Pallet feeder

Depalletizing supported
(Removing packages from the pallet)

Robot hand suction

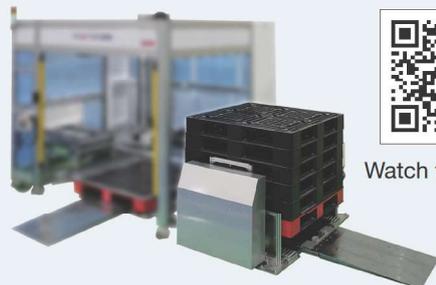

Servo hand

Example of a suction hand
(Sliding hand) PAT.P

Patent pending (May 21, 2021)

Example of a pallet feeder

Watch the video

Multi-palletizer for low overall height

PXL series

PXL-1535

PXL-1535

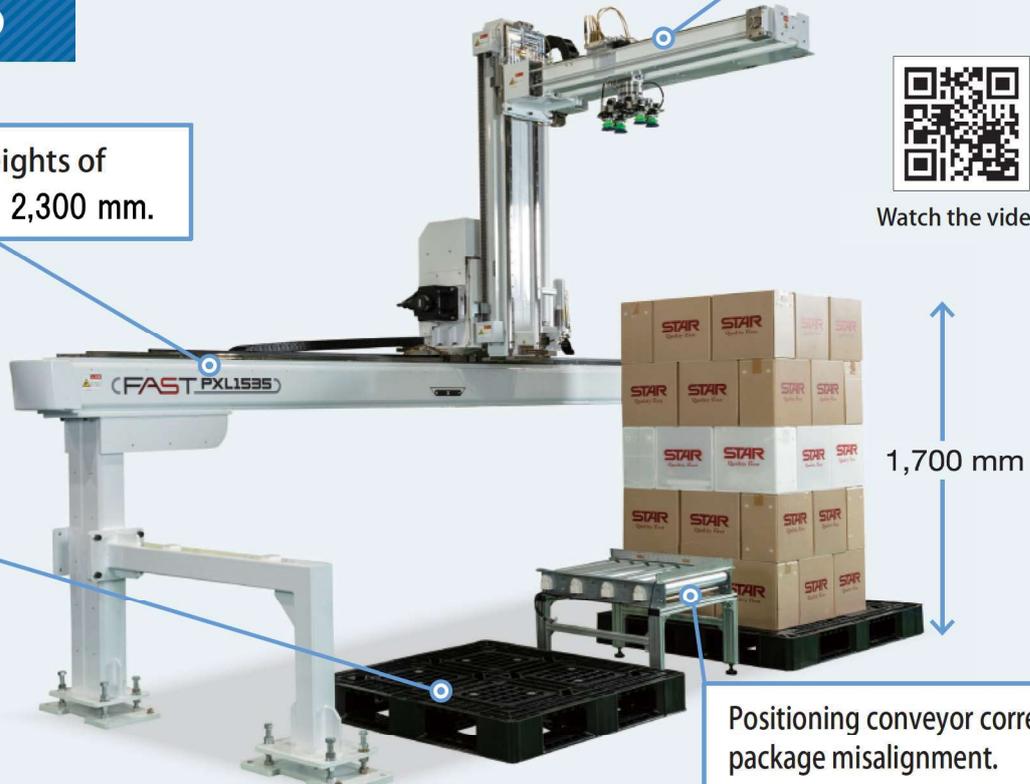

Supports stacking heights of 1,700 mm, and OP of 2,300 mm.
(*150 mm pallet.)

Easily transfer between pallets (T14 to T11).

Boast a low overall height of 2,421 mm, despite being a multi-tier stacking machine.

Watch the video

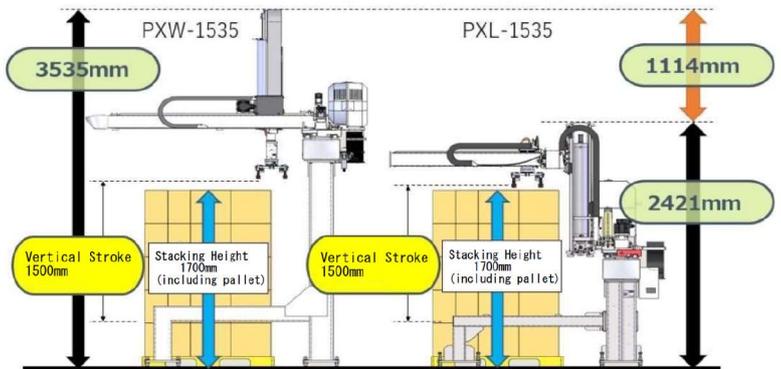

Easily transfer between pallets

It can correct the package misalignment that tends to occur with multi-tier stacking while transferring between pallets.

Capable of multi-tier stacking despite low overall height

Compared to PXW-1535, the overall height is designed to be 1114 mm lower, even though the stacking height is the same.

* Comparison of PXW-1535 and PXL-1535

► Payload

Supports up to 35 kg

PXL-1535

(Including robot hand weight)

► Processing capacity (transfer)

10 boxes /min

PXL-1535

*Figures based on our evaluation criteria.

► Size (standard type)

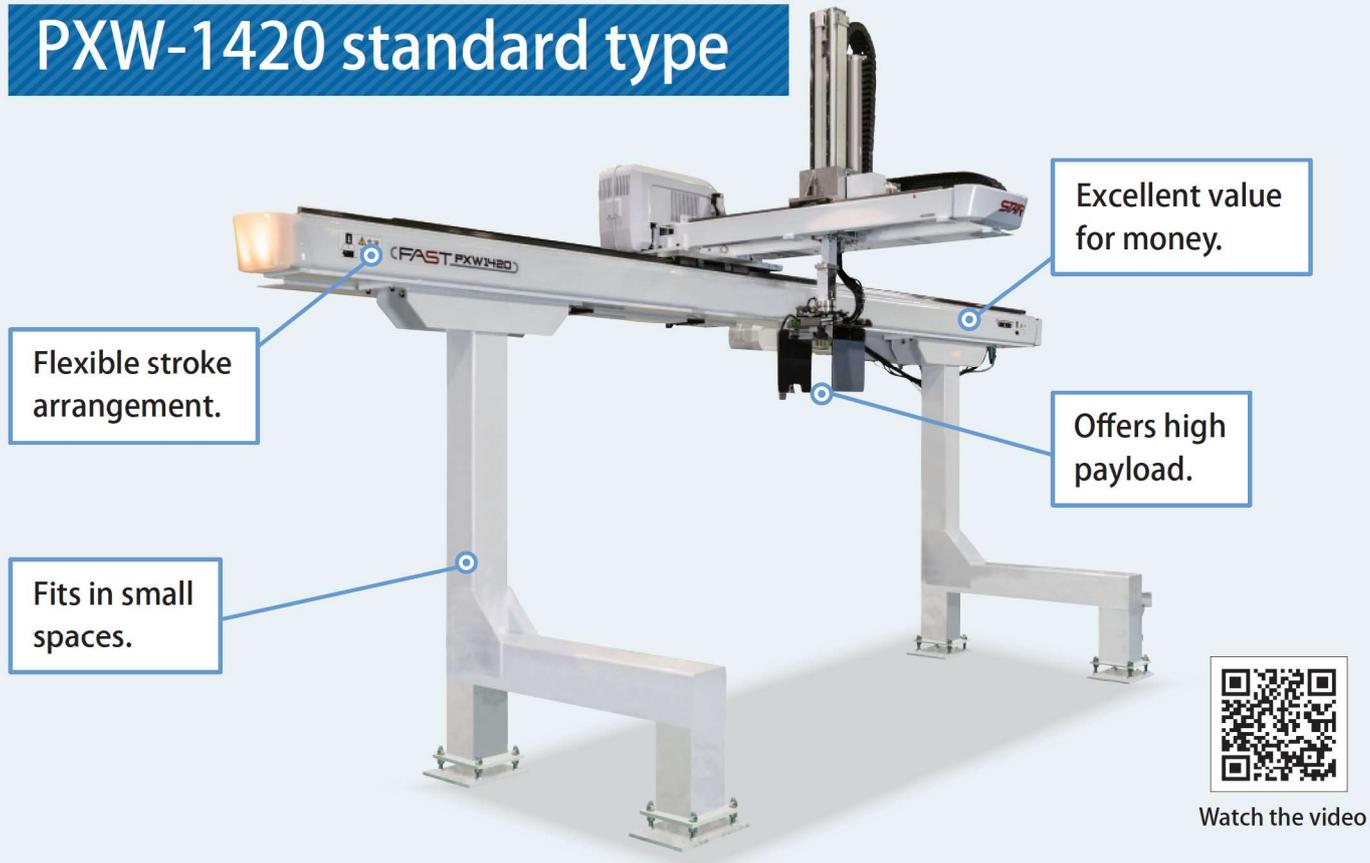

PXL-1535

4,913 (L) × 2,323 (W) × 2,421 (H) mm

Multi-stroke Palletizer PXW series

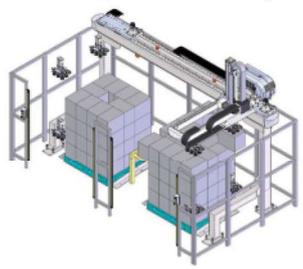

PXW-1420/PXW-1535/
PXW-1550

PXW-1420 standard type

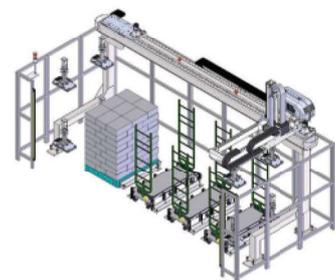

2-pallet SPEC (PXW-1420)

- Sort two types of pallets
- Stand-by for transfer pallet

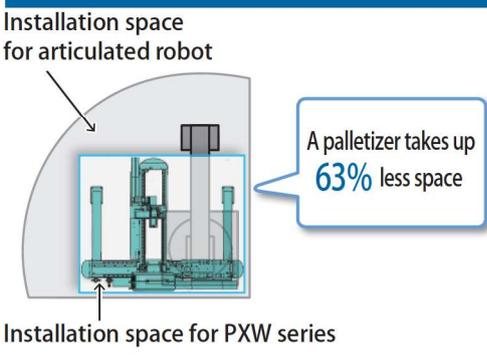

Depalletizing transfer SPEC (PXW-1420)

- Transfer goods to a six-wheel cart

Requires 63% less space than articulated robots

► Payload

- Supports up to **20 kg** PXW-1420 (Including robot hand weight)
- Supports up to **35 kg** PXW-1535 (Including robot hand weight)
- Supports up to **50 kg** PXW-1550 (Including robot hand weight)

► Processing capacity

- 10 boxes/min** PXW-1420/PXW-1535/PXW-1550

► Size

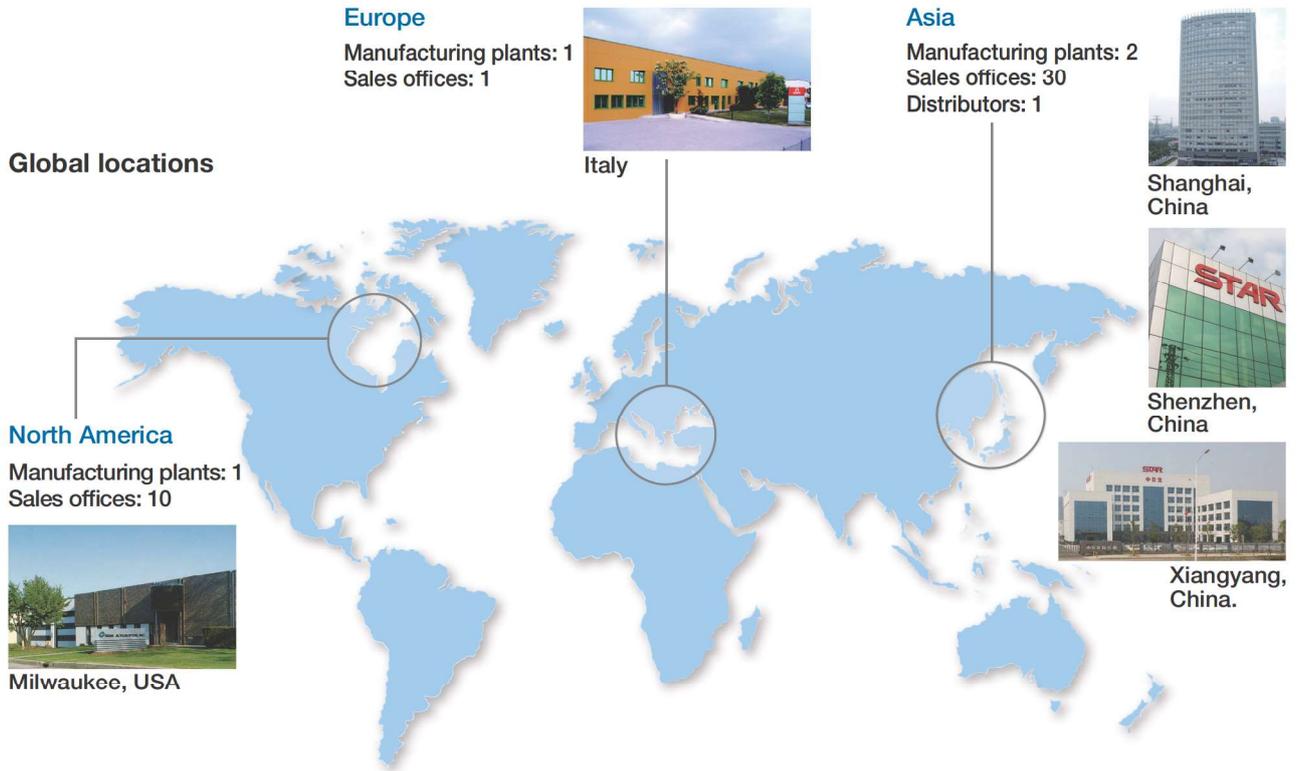

- PXW-1420: 4,748 (L) × 2,390 (W) × 3,486 (H) mm
- PXW-1535: 4,748 (L) × 2,390 (W) × 3,567 (H) mm
- PXW-1550: 4,671 (L) × 2,668 (W) × 3,748 (H) mm

Service & Support

We offer complete support for your palletizers

In the unlikely event you have a problem, our nearest STAR GROUP service center will respond promptly.

Global locations

You'll find the latest palletizers on display in our permanent exhibition room "STAR PLAZA."

- Nagoya STAR PLAZA (Head Office)**
- Kanto STAR PLAZA**
- Osaka STAR PLAZA**
- STAR SEIKI THAILAND STAR PLAZA**

Robot hand section air consumption

Sliding hand PAT.P	Air ejector 4-part version	57 L/min × 4 = 228 L/min
	Air ejector 8-part version	57 L/min × 8 = 456 L/min
Sponge suction gripper	755 L/min	
Suction gripper for materials bag PAT.P	755 L/min	

* Overall air consumption is the total sum of main unit air consumption plus robot hand air consumption.

Robot hand examples

Carrying 2 boxes

Carrying round can

Carrying plastic container

Carrying materials bag

Star Seiki is a general manufacturer of cartesian coordinate robots.

We are one of the leading manufacturers in the industry, having shipped a cumulative total of 233,000 unloaders for plastic injection molded products (as of 2022).

We apply the know-how regarding mechanisms, controls, safety measures, and operation that we have built up through robot development to palletizers.
